

Custom Software for Ambitious Companies

We help firms modernize their portfolio operations with custom software

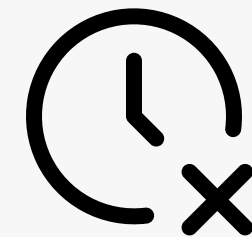

Traditional software development is broken

Expensive

Six-figure price tags makes most projects not economically feasible

Lengthy

Year long build times makes it nearly impossible to iterate and adapt

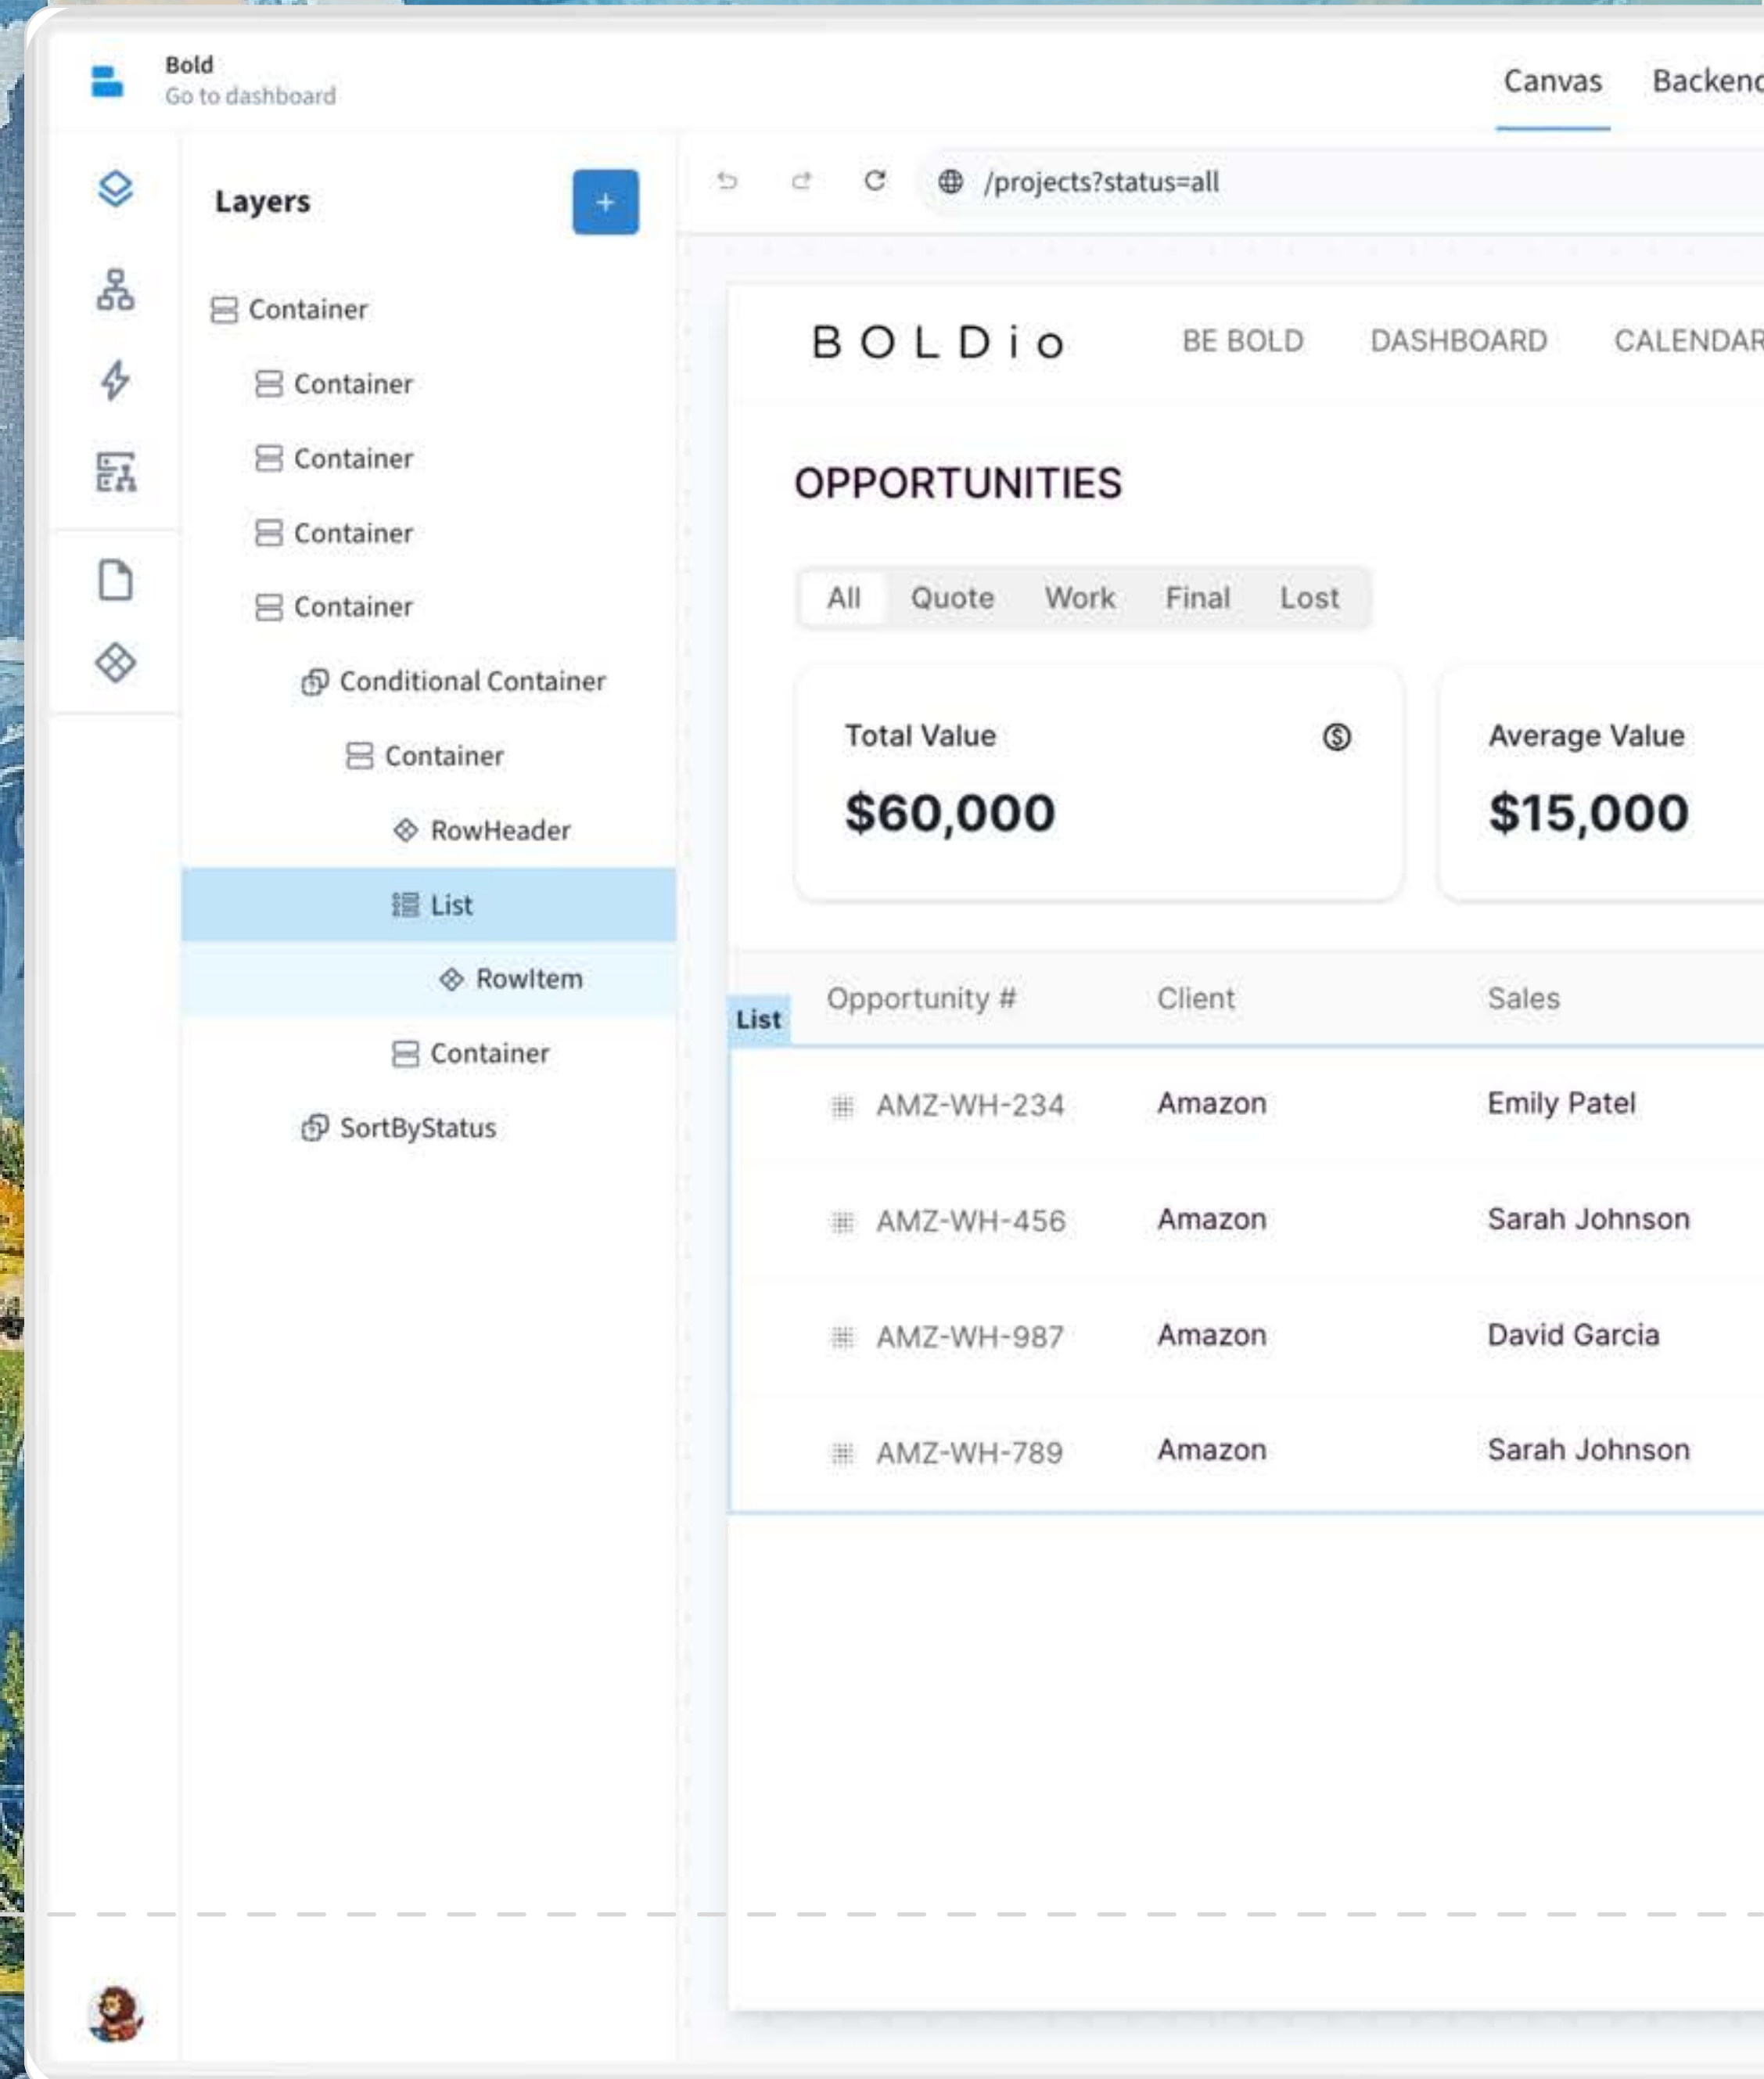

Brittle

Stuck with longterm maintenance burdens

Devize is Different.

Our visual development platform enables us to deliver custom software in a **fraction of the time and cost** with no long term maintenance burden.

Case Study 1

Problem

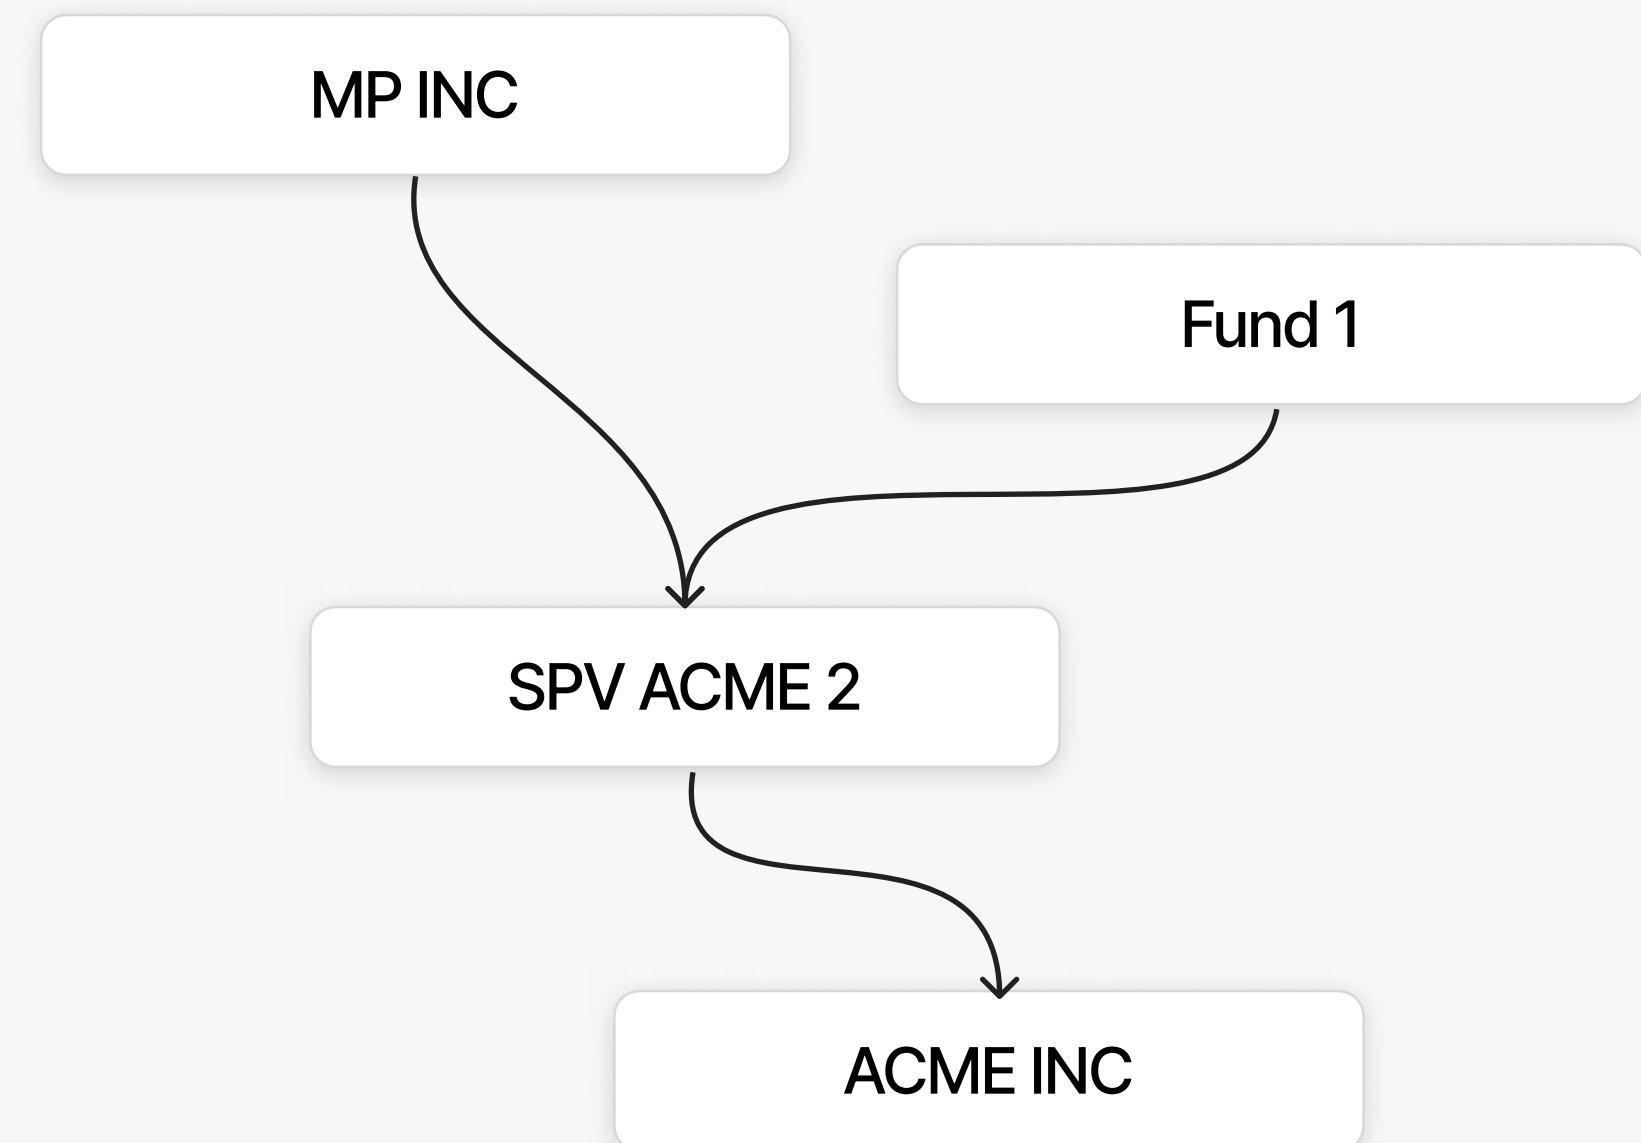

A PE firm spent 40+ hours each month maintaining its cap table and preparing regulatory and LP reports

Solution

A bespoke cap table management platform with built in diagramming, compliance checks, and report generation built in under 8 weeks

Outcome

The firm spends <5 hours a week with less human error and filling mistakes

Case Study 2

Problem

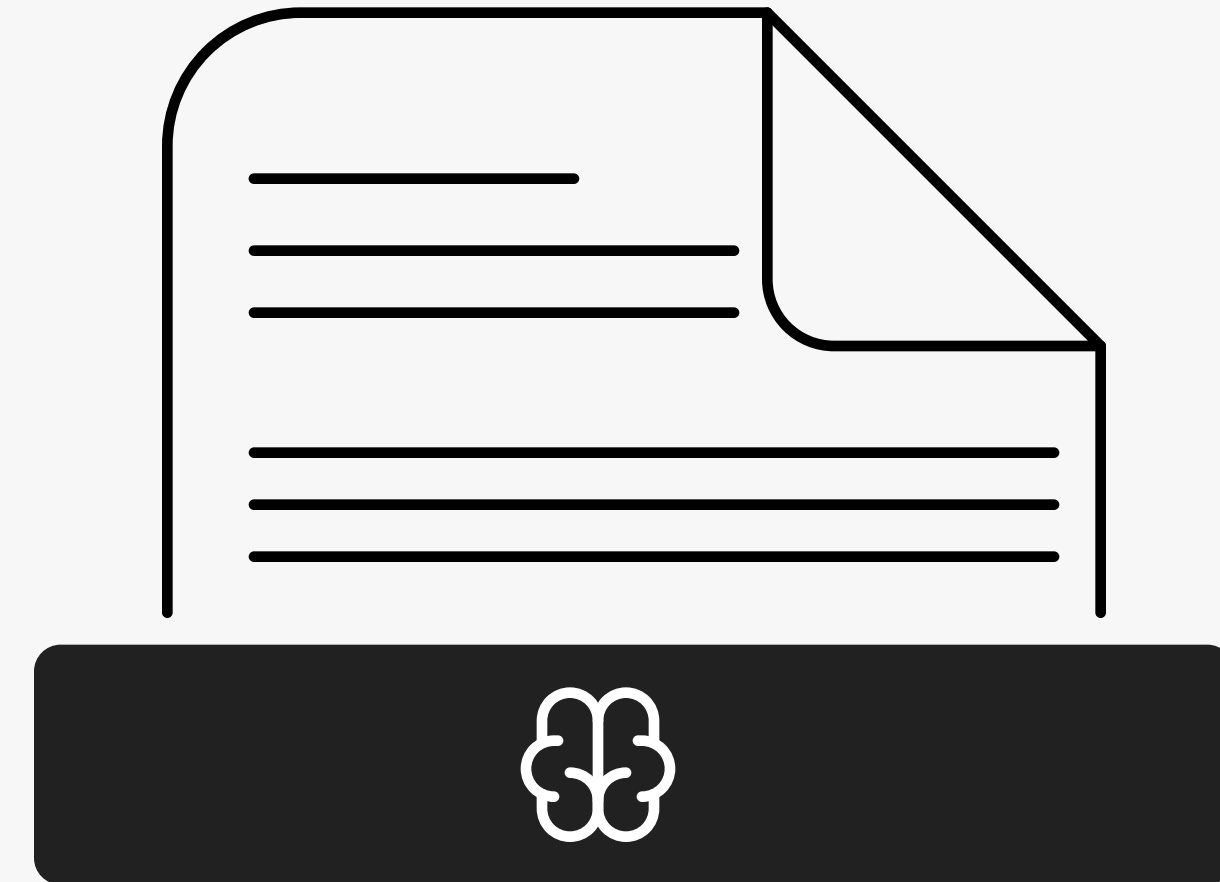

A home care staffing agency was bottle necked by the amount of qualitative customer data they needed to review before placing an caregiver

Solution

AI powered scraper that ingests state generated PDFs, extracts the quantitative data and summarize the qualitative data into relevant bullet points - built in 3 weeks

Outcome

The company has grown 40% without increasing headcount
